

Pumpkin Carving

ACTIVITY

Shopping List

Pumpkin

Small sharp knife
(kid friendly!)

Big spoon

Tea light

1.

Use the pen to draw a lid shape on the top of your pumpkin. It needs to be big enough to get a hand in with the tea light.

2.

Then draw a face onto the best side of your pumpkin. Easy shapes are squares, triangles and rectangles! Be sure to space out the eyes/nose/mouth!

3.

Using a small sharp knife, cut out the lid and clean up the lid. Use the spoon to scoop out all the insides. (Don't throw these away - there are so many uses for this part!).

You want to scrape the sides so the pumpkin is as empty as possible.

4.

Finally, cut out the face. Don't worry if you don't cut exactly on the lines. Then add the tea light and put the lid back on top!
