

Rainbow Gloop

ACTIVITY

This is a great activity and super easy to clear up as it easily dissolves with water.

Assemble with:

Food colouring

Cornflour

Egg cup

Play spoons

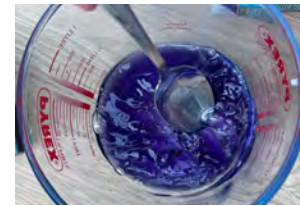

Toys based on the child's interests

Water

A tray

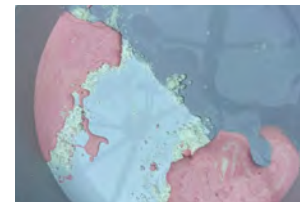

1.

Mix together a drop of food colouring with 2 egg cups of water until thoroughly mixed together. This prevents the colouring staining the hands!

2.

Add 4 egg cups of cornflour and mix until it forms a thick gloop, at this point you can add more water or cornflour to make it thicker or looser.

3.

Pour the mixture into the tray and repeat the making process with another colour, continue until you have made all the colours.

When adding the separate colours I added a sprinkle of cornflour along the edges of the different colours to save it spreading all over the tray and prevent the colours mixing instantly.

4.

Add the animals and spoon and enjoy exploring and playing alongside the children! This is a great opportunity to use positional language and develop fine motor skills through control alongside scooping and pouring.

TOP TIP

This can be prepared ahead of time so a great one to make at nap time and then it's all ready to play when the little one awakes!
