

Pumpkin Volcano Science Experiment

ACTIVITY

nannypax

created by nannies, for nannies

The combination of the bicarb and vinegar causes a chemical reaction which creates a spectacular foaming eruption!

Assemble with:

Large pumpkin,
hollowed out

Squeeze bottles

2tbsps of
Bicarbonate of
soda

Halloween food
colouring

White vinegar

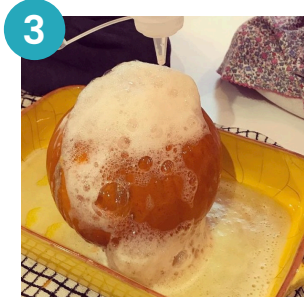

1

Hollow out a large pumpkin
and add the bicarbonate of
soda into bottom of pumpkin

2

Add your white wine vinegar
and food colouring into a couple
of squeeze bottles.

3

Squeeze vinegar into
pumpkin and watch the
eruption come to life!
